

## About

- ▶ An alternative strategy designed to help investors **mitigate stock market downturns while participating in growth.**
- ▶ Seeks to generate **absolute returns with low correlation to broad stock and bond markets.**
- ▶ Rotates tactically between Treasuries and **Equities using historically proven leading indicators to volatility.**

## Overview

The ATAC Rotation Mutual Fund is managed by Toroso Investments, LLC, an independent registered investment advisor. The strategy was developed by Portfolio Manager Michael A. Gayed, CFA.

The Funds rotate offensively or defensively based on historically proven leading indicators of volatility, with the goal of taking less risk at the right time.

## Portfolio Managers

Michael A. Gayed, CFA PM & Award Winning Author 16 Years Of Investment Experience

## Investment Process

- Analyze.** Do conditions favor higher or lower stock market.
- Rotate.** Higher volatility: rotate into Treasuries. Lower volatility: rotate into Equities.
- Evaluate.** Weekly for potential changes.

## Commentary

Investor enthusiasm over the emergence of artificial intelligence produced one of the narrowest U.S. stock market rallies in recent memory. The largest gains were restricted to mega-cap tech and any strategies that diversified beyond the "super 7 stocks" likely struggled to keep pace. Since utilities and Treasuries, the two asset classes that drive the signaling, were down in the 2nd quarter, the fund was positioned correctly throughout most of the quarter, but the lack of a broader market advance contributed to limiting some upside potential. The use of small-caps in risk-on positioning helped add to returns, but the exposure to emerging markets was a drag.

The Fed continues to have a hand in the behavior of Treasuries and we'd prefer to see the return of more traditional risk-on/risk-off behavior in order to maximize the fund's return potential. While U.S. economic conditions have generally remained positive for longer than expected, we remain committed to the idea that longer-term recessionary risks are still looming. Sticky and persistent inflation is likely to be a recurring theme into 2024. The Fed's "higher for longer" narrative with respect to monetary policy could be a wild card that impacts the effectiveness of traditional risk-on/risk-off behaviors.

## Fund Facts (As of 06/30/23)

Share Class	Investor	Institutional
Ticker	ATACX	ATCIX
Total Fund Assets	\$65 million	\$65 million
CUSIP	56166Y818	56167N639

Subsequent Investment Amount	\$100	\$100
Minimum IRA Initial Investment	\$2,500	\$25,000
Inception Date*	9/10/2012	3/26/2018

## Performance

(Average Annual Total Return As of 06/30/23)

Time Period	YTD	1 Yr	3 Yr	5 Yr	Since Inception Annualized*
ATAC Rotation Fund inst.	-3.84%	-4.36%	-8.21%	0.28%	4.57%
ATAC Rotation Fund Inv.	-3.94%	-4.57%	-8.43%	0.04%	4.31%
Lipper Flexible Portfolio Index	3.24%	8.83%	6.10%	5.92%	5.73%

## Historical Correlation

\*Performance shown for the periods prior to the inception of the Institutional Class is based on the performance for the Investor Class shares, adjusted for the lower expenses applicable to the Institutional Class.

Performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Fund performance current to the most recent month-end may be lower or higher than the performance quoted and can be obtained by calling 1-855-ATACFUND. Time periods over one year are annualized unless noted otherwise.

The institutional share class gross expense ratio is 1.89% and net expense ratio is 1.70%. The investor share class gross expense ratio is 2.14% and net expense ratio is 1.95%. The Advisor has contractually agreed to waive a portion or all of its management fees and reimburse Fund expenses, in order to ensure that Total Annual Fund Operating Expenses (excluding AFFE, leverage/borrowing interest, interest expense, taxes, brokerage commissions and extraordinary expenses) do not exceed 1.74% of the average daily net assets of the Fund's Investor Class shares and do not exceed 1.49% of the average daily net assets of the Fund's Institutional Class shares through May 1, 2022. The net expense ratio was applicable to investors.

## Important Risk Disclosure For The ATAC Rotation Fund

---

Correlation is a statistical measure of how two securities move in relation to each other. The S&P 500 Index is a broad based unmanaged index of 500 stocks, which is widely recognized as representative of equity market in general. Russell 2000 is an index measuring the performance approximately 2,000 small-cap companies. MSCI Emerging Markets Index is an index created by Morgan Stanley Capital International (MSCI) that is designed to measure equity market performance in global emerging markets. The S&P US Treasury Bond Index 1 to 3 Year is a rules-based market-value weighted index engineered to measure the fixed-rate local currency securities publically issues by the United States which includes bonds maturing in 1 to 3 years. The S&P US Treasury Bond Index 7-10 Year is a rules-based market-value weighted index engineered to measure the fixed-rate local currency securities publically issues by the United States which includes bonds maturing in 7-10 years. The Lipper Flexible Portfolio Fund Index is an equal dollar weighted index of the largest mutual funds within the Flexible Portfolio fund classification, as defined by Lipper. You cannot invest directly in an index.

### **Absolute return strategies are not intended to outperform stocks and bonds during strong market rallies**

Mutual fund investing involves risk. Principal loss is possible. Because the Fund invests primarily in ETFs, it may invest a greater percentage of its assets in the securities of a single issuer and therefore is considered non-diversified. If a Fund invests a greater percentage of its assets in the securities of a single issuer, its value may decline to a greater degree than if the fund held were a more diversified mutual fund. The fund is expected to have a high portfolio turnover ratio which has the potential to result in the realization by the Fund and distribution to shareholders of a greater amount of capital gains. This means that investors will be likely to have a higher tax liability. Because the Fund invests in Underlying ETFs an investor will indirectly bear the principal risks of the Underlying ETFs, including but not limited to, risks associated with investments in ETFs, large and smaller companies, real estate investment trusts, foreign securities, non-diversification, high yield bonds, fixed income investments, derivatives, leverage, short sales and commodities. The Fund will bear its share of the fees and expenses of the underlying funds. Shareholders will pay higher expenses than would be the case if making direct investments in the underlying funds.

The Fund's investment objectives, risks, charges, expenses and other information are described in the statutory or summary prospectus, which must be read and considered carefully before investing. You may download the statutory or summary prospectus or obtain a hard copy by calling 855-ATACFUND or visiting [www.atac-fund.com](http://www.atac-fund.com). Please read the Prospectuses carefully before you invest.
